PROFESSIONAL SUMMARY

Full Stack Web Developer with 5 years of experience in PHP, Laravel, React.js, and Node.js. A complex problem-solver with a strong analytical mindset, dedicated to delivering high-quality code and meeting tight deadlines. Proven in both leadership and collaborative roles, with expertise in database management and version control.

SKILLS

- **Backend Development:** PHP, Laravel, Nest.js, Node.js, Python
- **Frontend Development:** Next.js, JavaScript, jQuery, Livewire
- **Database Management:** MySQL, MongoDB
- **Server Management:** AWS
- **Version Control:** Git

WORK HISTORY

- 02/2024 to Current **Senior Software Engineer II**
Get Licensed – Karachi, Pakistan
- Paired with fellow engineers to brainstorm ideas, debug problems and review code.
 - Adopted engineering best practices and delivered highest quality scalable solutions.
 - Designed and implemented scalable application programming interfaces.
 - Created and maintained service desk diagnostics and job aids and reviewed with technicians to confirm clarity.
 - Developed complex software and systems deploying one or more programming languages.
- 09/2021 to 01/2024 **Software Engineering Team Lead**
Digital Auxilius – Karachi, Pakistan
- Coordinated with other engineers to evaluate and improve software and hardware interfaces.
 - Identified and documented project changes with proactive budget oversight.
 - Provided direction and guidance to process improvements and established policies.
 - Collaborated with fellow engineers to evaluate software and hardware interfaces.
 - Tested methodology with writing and execution of test plans, debugging and testing scripts and tools.
 - Informed internal personnel and external stakeholders of project milestones.
- 06/2019 to 03/2022 **Software Engineer (Web)**
Cooperative Computing
- Delivered unit-tested systems within customer-prescribed timeframes.
 - Collaborated with management, internal and development partners regarding software application design status and project progress.
 - Developed robust, scalable, modular and API-centric infrastructures.
 - Tested methodology with writing and execution of test plans, debugging and testing scripts and tools.

- Designed and developed forward-thinking systems that meet user needs and improve productivity.
- Tested and deployed scalable and highly available software products.

EDUCATION

03/2021

Bachelor of Science: Computer Science
Indus University - Karachi, Sindh, Pakistan

PROJECTS

Highlights of My Projects

- **eCert**
02/2024 - Present
Online platform for tests, assessments, and certificates. Features include Admin, LMS, and Website layers. Currently undergoing rebranding and revamp using Laravel for APIs and NextJS for frontend.
- **Syncora**
06/2023 - 01/2024
Synchronizes data between clinical trial management systems (CTMS) to ensure automatic data synchronization between connected systems.
Technologies Used: NodeJS (NestJS), NextJS
- **HealthCare Talent Link**
08/2022 - 08/2023
A platform connecting healthcare professionals with features including a Job Portal, Live Interview, and Service Management.
Technologies Used: Laravel, NextJS
- **PMO Finance Dashboard**
11/2022 - 07/2023
A finance portal integrating Jira for resource time management and HubPlanner for resource billing.
Technologies Used: Python, MongoDB, MySQL, ReactJS
Third Parties Used: Atlassian Jira, HubPlanner
- **Bedrock**
06/2021 - 08/2022
API-oriented project with integration focus.
Technologies Used: Laravel

CERTIFICATIONS

- **ACCP-Pro: Diploma in Software Engineering**, Aptech Computer Education
- 10/2015 - 10/2018
